Informationen:

- The BRABUS Power Distribution Module Light (PDM-Light) must be installed for the illuminated radiator grille emblem to function properly.
- Information on the function of the BRABUS-PDM and installation instructions can be found under item number 465-PDM-00.
- The following installation instructions for the illuminated radiator grille emblem (465-290-00) assume that the BRABUS PDM Light has already been installed and are based on the instructions in its installation manual.

  Attention: The illuminated radiator grille logo is only active when the vehicle is opened and locked. This switches off when the engine is started, as a function during driving is not permitted in the EC approval area.

Cable routing:

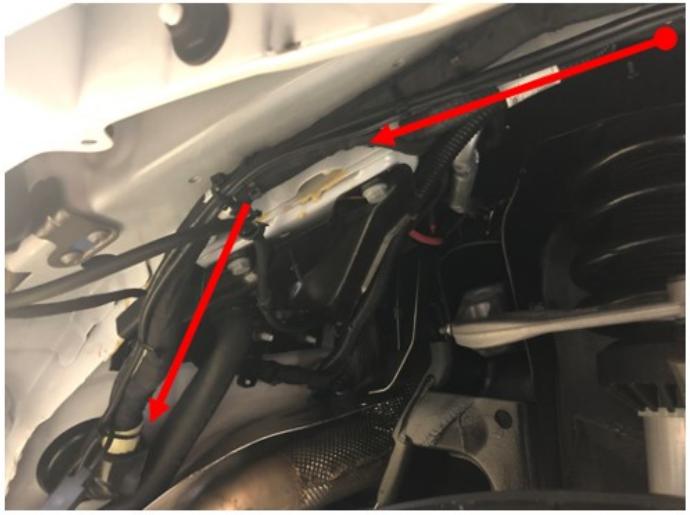

- Remove the front right wheel arch liner.
- Route the connection cable under the plastic cover to the wheel housing on the passenger side as shown in the illustration.

Official technology-partners Continental MOTUL YOKOHAMA ADVAN HANKOOK Member of VDN

- Attach the connection cable to existing cables in the upper area of the wheel arch using cable ties and guide it to the lower rear edge of the mudguard.

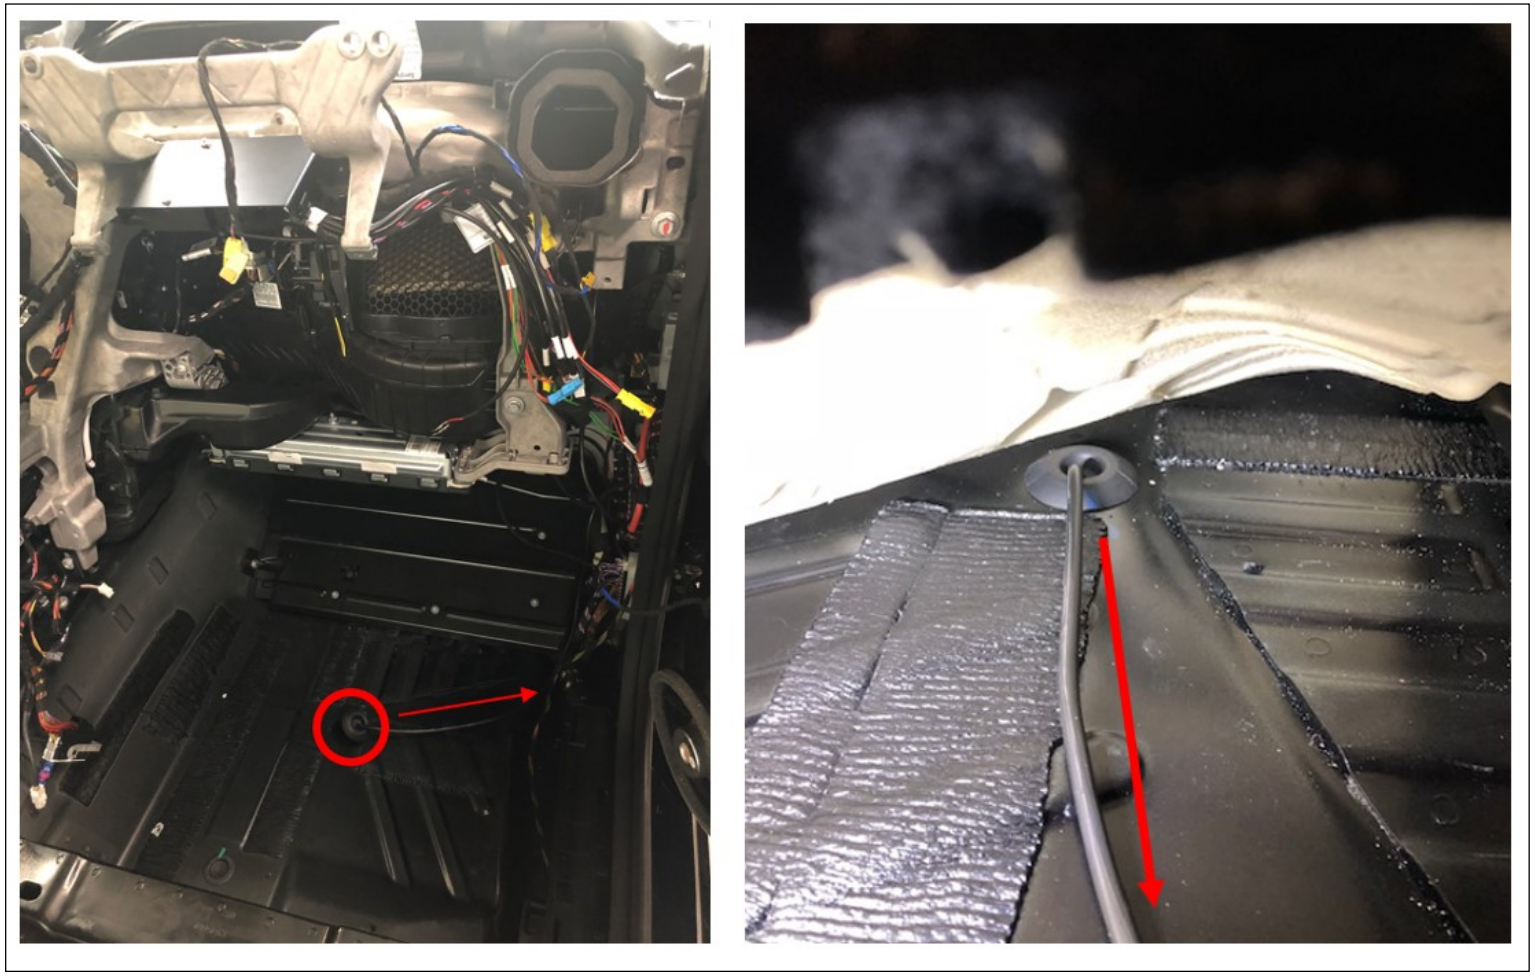

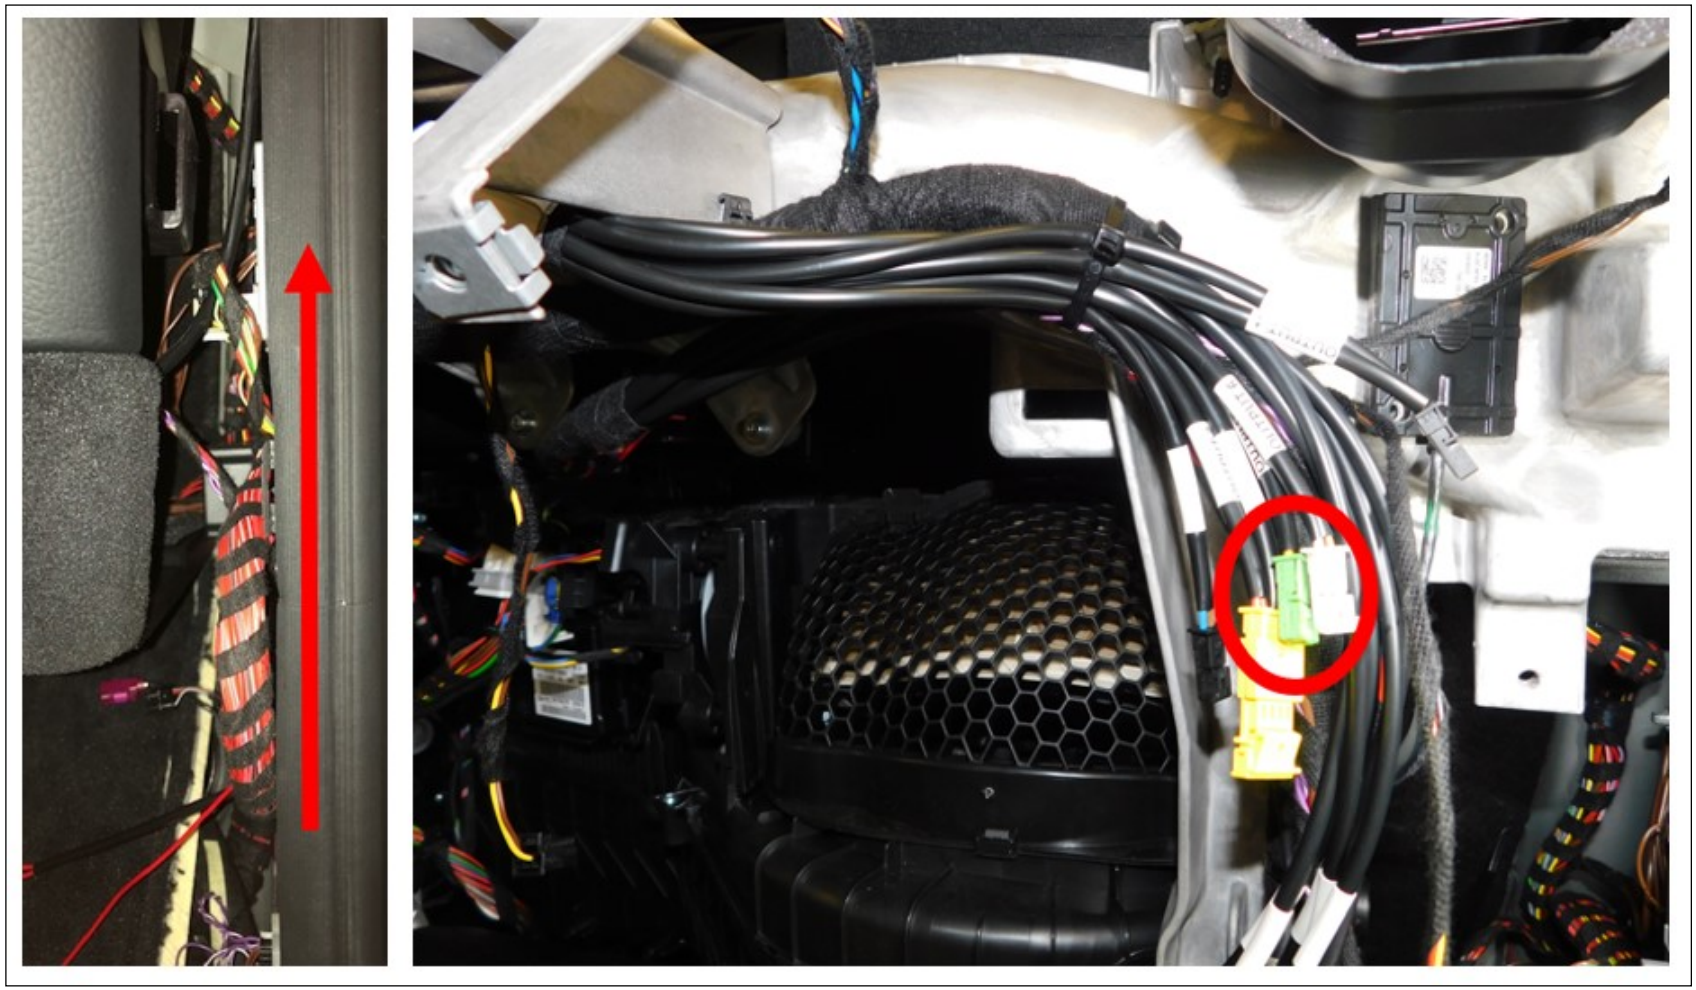

Official technology-partners Continental MOTUL YOKOHAMA ADVAN HANKOOK Member of VDN

- The connection cable is routed from the lower edge of the mudguard to a rubber grommet (sketch) in the area of the passenger footwell and into the passenger compartment.

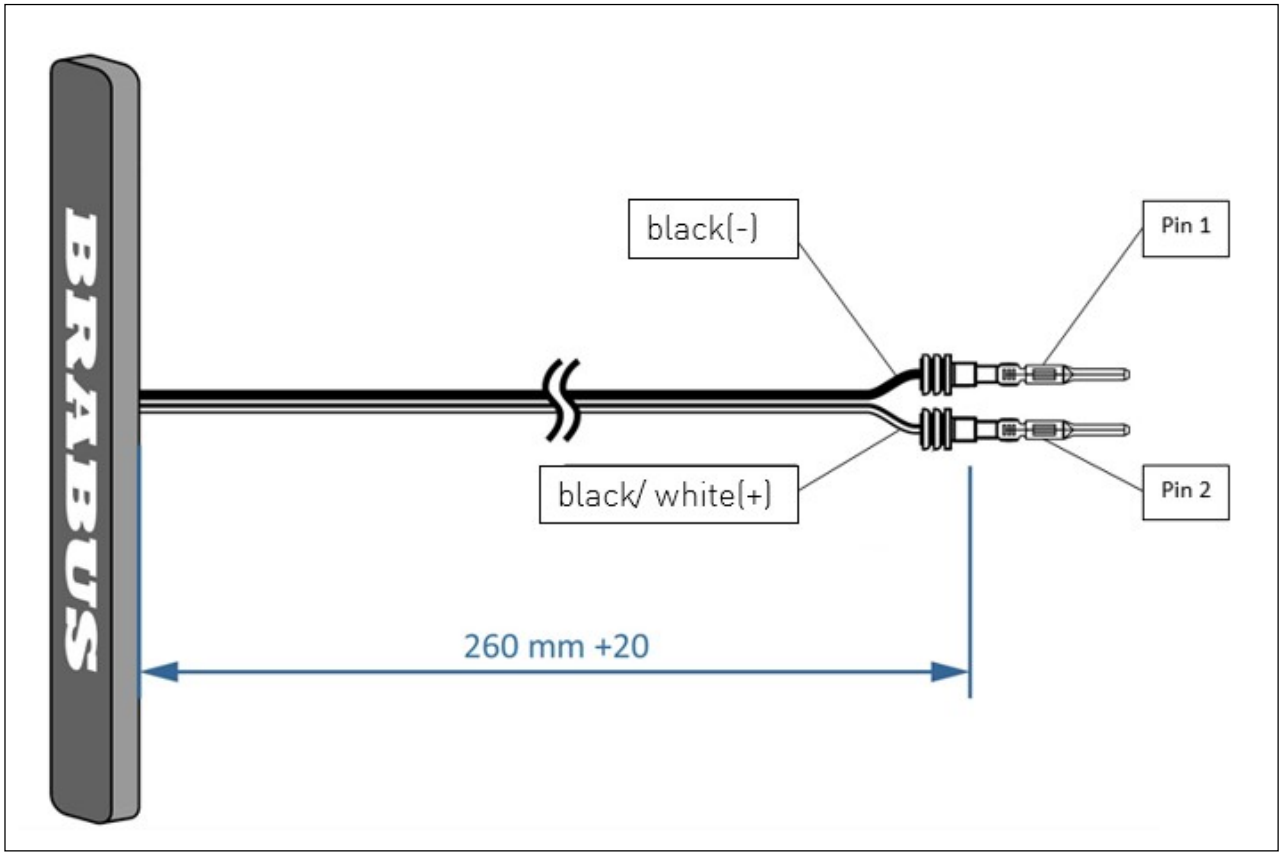

Official technology-partners Continental MOTUL YOKOHAMA ADVAN HANKOOK Member of VDN

- Lay the connection cable along the wiring harness to behind the glove compartment.
- Connect the cable there to the Output 7 connection of the BRABUS PDM-Light module.

Official technology-partners Continental MOTUL YOKOHAMA ADVAN HANKOOK Member of VDN

- Plug the emblem cables into the supplied connector. The assignment is shown in the following diagram.
- Now connect the illuminated emblem to the previously installed connection cable and check the emblem for function.
